

**Department of Pathology**

**Session plan**

Name of faculty: Dr. Ramya.G

Batch: V Semester

Date: 28.10.2020

Type of session: Lecture

Time: 9.0-11am

Duration of session: 2 hours

Topic for the session: Genetic disorders, Sex chromosomal disorders

| Time   | Design   | T-L method  | Moderator |
|--------|--|-------------|-----------|
| 10 min | Attendance                                       | -           | Faculty   |
| 20 min | Set Induction                                    | Interaction |           |
| 20 min | Introduction of genetic and chromosome disorders | PPT         |           |
| 20 min | Chromosome structure and nomenclature            |             |           |
| 20 min | Chromosome disorders                             |             |           |
| 20 min | Lab diagnosis of genetic disorders.              |             |           |
| 10 min | Summary  | Interaction |           |
