## PREFACE

---

This Drug Formulary of Sri Manakula Vinayagar Medical College and Hospital is a concise and handy book designed for quick reference of current essential drugs in medical practice. As it is not possible to include all drugs, commonly used drugs in our hospital with their recommended dosages, both in adults and children, adverse drug reaction and cost have been included. However, as the medical knowledge is vast and continuously being upgraded, changes may have occurred and may not be reflected in the incorporated information. Clinical judgment and experience should be used while prescribing the drugs.

**Note:** Dose of drug varies with indications and severity of disease, the given doses is just for reference, and is for the most common indication. Where feasible, the dose ranges from lowest to maximal permissible doses have been given. Paediatric doses are for children more than 1 month of age i.e. neonatal doses may vary. The price given is for an estimation of the cost of therapy and not the exact selling price, which may vary.

“Let food be thy medicine and medicine be thy food.”
