

An Autonomous Institution

WORKSHOP ON CONTEXT-SPECIFIC CURRICULUM DEVELOPMENT & EVALUATION

Department of Community Medicine

Learning Outcomes:

1. Apply best practices in designing and evaluating context-specific curricula for academic or training programs.
2. Demonstrate independent and critical thinking in making educational decisions.
3. Engage in reflective practice to connect educational theory with real-world application.

Why this Course?

This course invites educators to critically engage with the curriculum as a powerful and cost-effective tool for societal and public health improvement. Participants will explore how the curriculum should evolve in response to societal needs and how educators can actively shape it through research and advocacy. Designed as an interactive, safe and reflective space, the course fosters independent thinking rather than passive compliance. Join us to rethink, redesign, and reimagine the curriculum for meaningful impact.

Course Philosophy :

The course adopts a constructivist approach, wherein understanding will be collaboratively built through dialogue and interaction between facilitators and participants.

Duration and Mode :

Five-day in-person course

Intended Participants:

Early/mid-carrier educators across all health professions and programme settings who are interested in or actively involved in trainings/educational matters/educational research

Apply Now : 20 participants will be selected on a first come, first served basis.
