### **Certificate course on environmental health and hygiene**

The Value added course on “Environmental health and hygiene” for III year students was conducted by department of community medicine for 19 days, from 12.06.17 to 30.06.17. The course was very well organized and the instructors were extremely knowledgeable.

#### **Course Objectives:**

- Familiarize participants with food sample collection and food sample analysis in laboratory.
- Educate students about the interplay between human health and the environment, emphasizing the impact of pollution, climate change, and ecosystem disruptions on public health.
- Equip students with the knowledge to advocate for environmentally conscious healthcare policies and contribute to public health policy making.
- Teach responsible waste management strategies, especially in healthcare settings, to minimize environmental pollution and its impact on human health

#### **Conclusion:**

The participants gained the knowledge in

- Recognizing the importance Environmental Health and Hygiene
- To equip future medical professionals with the knowledge and skills necessary to incorporate environmental consciousness and hygiene best practices into their medical careers.
- Familiarize participants with food sample collection and food sample analysis in laboratory
- Developing and promoting environmentally conscious healthcare policies.
- Training students to communicate environmental and hygiene-related information effectively to patients and the public to promote awareness and behavior change
- Promoting a healthier and sustainable environment for the benefit of both present and future generations.
