

## REPORT

### PG Entrance Examination Coaching (2017-18)

It is informed that the Post Graduate Entrance Exam Coaching for MBBS 2014 Batch was conducted from 04th February till December 2017. Dr. K. Vinoth, Assistant Professor of Psychiatry coordinated. A total of 166 students got benefitted from the session towards their forthcoming NEET examinations.

**Pharmacology:** These sessions, conducted by Dr. Thirunavukarasu, delve into the intricate world of pharmacology, focusing on the mechanisms of action, interactions, and therapeutic applications of various drugs. Students will gain insights into how pharmaceutical agents affect the body's systems and the importance of choosing the right medication for different medical conditions.

**Forensic Medicine:** Led by Dr. Ganesh Kumar, this session explores the fascinating realm of forensic medicine, where students will learn about the application of medical knowledge in legal contexts. Topics covered may include autopsy procedures, toxicology, forensic pathology, and the role of medical evidence in legal investigations.

**Orthopaedics:** In these classes, Dr. Sathyanarayanan will introduce students to the realm of orthopaedics, focusing on the diagnosis, treatment, and management of musculoskeletal disorders and injuries. Students will gain insights into surgical and non-surgical approaches to restore mobility and functionality to patients.

**Radiology:** Dr. Uma will guide students through the principles of radiology, enabling them to interpret various imaging modalities such as X-rays, CT scans, and MRIs. These sessions will help students develop the skills necessary to visualize and diagnose medical conditions through medical imaging techniques.

**ENT:** Dr. Gowri Shankar will cover the intricacies of ear, nose, and throat conditions, providing an understanding of common ailments and treatment approaches related to these sensory organs. Students will learn about diagnostic methods and surgical interventions for ENT-related issues.

**Ophthalmology:** Led by Dr. Venkatesan, these sessions will explore the world of ophthalmology, delving into the anatomy and disorders of the eye. Students will gain insights into the diagnosis and management of various eye conditions, as well as surgical procedures to address vision-related problems.

**Dr. KAGNE. R.N**

DEAN

SRI MANAKULA VINAYAGAR  
MEDICAL COLLEGE & HOSPITAL  
KALITHEERTHALKUPPAM,  
PUDUCHERRY-605107.

**Community Medicine-1:** Dr. Balaji will guide students through the realm of community medicine, emphasizing preventive healthcare, epidemiology, and public health interventions. These sessions will highlight the importance of community-level healthcare strategies and disease prevention measures.

**Psychiatry:** Conducted by Dr. Raman.K, these sessions will delve into the realm of psychiatry, covering mental health disorders, their diagnosis, and treatment options. Students will gain insights into the complexities of psychological well-being and learn how to provide support to individuals facing mental health challenges.

**Dermatology:** Dr. Karthikeyan.K will shed light on dermatology, covering skin disorders, their diagnosis, and treatment methods. Students will learn about various skin conditions, their underlying causes, and approaches to manage and maintain healthy skin.

**Anaesthesia:** In these sessions, Dr. Saravanan will introduce students to the world of anaesthesia, focusing on administering anesthesia for surgical procedures, pain management, and patient safety during surgery. Students will learn about different types of anesthesia and their applications.

**Microbiology-1, 2 (Dr. Mohana):** Dr. Mohana, a microbiology expert, will guide students through the fascinating world of microorganisms. These sessions will cover topics such as bacteria, viruses, fungi, and parasites. Students will gain insights into microbial pathogenesis, laboratory techniques, and the role of microorganisms in health and disease.

**Anatomy-1, 2 (Dr. Rajan):** Dr. Rajan, an anatomy specialist, will delve into the structural foundation of the human body. In these sessions, students will explore the intricacies of human anatomy, including the skeletal system, muscles, organs, and systems. The lectures will provide a comprehensive understanding of the human body's structure and function.

**Biochemistry-1, 2 (Dr. Asmathulla .S):** Dr. Asmathulla .S, a biochemistry expert, will introduce students to the molecular basis of life. These sessions will cover topics such as biomolecules, enzymology, metabolism, and biochemical pathways. Students will gain insights into the chemical processes that drive cellular functions and contribute to overall health.

**Pathology-1, 2 (Dr. Ramya .G):** Dr. Ramya .G, a specialist in pathology, will lead sessions on the study of disease processes. Students will learn about the causes, mechanisms, and effects of various diseases. These lectures will cover topics like cellular pathology, histology, and diagnostic techniques used in the field of pathology.

**Physiology-1, 2 (Dr. Anu):** Dr. Anu, an expert in physiology, will guide students through the functions and mechanisms of the human body. These sessions will cover topics like cellular physiology, organ systems, and the integration of physiological processes.

cardiovascular system, respiratory system, nervous system, and homeostasis. Students will gain insights into how the body's systems work together to maintain optimal functioning

**Paediatrics-1, 2 (Dr. Sharath):** Dr. Sharath, a paediatrics specialist, will introduce students to the unique medical needs of children. These sessions will cover topics such as child development, common paediatric illnesses, immunization schedules, and growth milestones. Students will gain insights into providing medical care to infants, children, and adolescents.

**Medicine-1, 2, 3, 4 (Dr. Manikandan):** Dr. Manikandan, an expert in internal medicine, will guide students through the complexities of medical diagnoses and treatments. These sessions will cover various medical conditions, including their symptoms, diagnostic procedures, and therapeutic approaches. Students will gain insights into different branches of medicine and their practical applications.

**OBG-1, 2 (Dr. Ambujam):** Dr. Ambujam, an obstetrics and gynaecology specialist, will lead sessions on women's reproductive health. Students will learn about pregnancy, childbirth, gynaecological conditions, and family planning. These lectures will provide a comprehensive understanding of women's health and the medical care required during different stages of life.

**General Surgery-1, 2, 3, 4 (Dr. John Paul):** Dr. John Paul, a specialist in general surgery, will introduce students to surgical techniques and procedures. These sessions will cover topics such as surgical anatomy, wound healing, and common surgical interventions. Students will gain insights into the principles of surgical practice and patient care.
