No deviations from or changes of the protocol should be initiated without prior written approval by the Ethics Committee of an appropriate amendment. The Ethics Committee expects that the investigator should promptly report to the Ethics Committee any deviations or changes of the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or reputation of the institute.

For studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 21.06.2021.

A copy of the final completion report should be submitted to Ethics Committee for review.

No deviations from or changes of the protocol should be initiated without prior written approval by the Ethics Committee of an appropriate amendment. The Ethics Committee expects that the investigator should promptly report to the Ethics Committee any deviations or changes of the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or reputation of the institute.

For studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 19.12.2022.

A copy of the final completion report should be submitted to Ethics Committee for review.

The EC hereby approves the proposal entitled, "A study on the role of visceral adiposity index in correlation with glycaemic status of diabetic individuals".

It is understood that the study will be conducted under your direction, in a total of 108 research participants, at Department of General Medicine, as per the submitted protocol.

Date of approval of the study: 02/12/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 01/11/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

It is understood that the study will be conducted under your direction, in a total of 134 research participants, at Dept. of Nephrology, as per the submitted protocol.

Date of approval of the study: 05.08.2021

This approval is valid for the entire duration of the study.

No deviations from, or changes of the protocol should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 04.07.2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

It is understood that the study will be conducted under your direction, in a total of 54 research participants, at Dept. of Community Medicine, as per the submitted protocol.

Date of approval of the study: 11.08.2021

This approval is valid for the entire duration of the study.

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 10.07.2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Clinico morphological patterns of sweat induced dermatitis".

It is understood that the study will be conducted under your direction, in a total of 152 research participants, at Dept. of Dermatology, Venereology & Leprosy, as per the submitted protocol.

Date of approval of the study: 11/08/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 10/07/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Correlation of Two Minute and Six Minute walk test with Spirometric indices in patients with severe chronic obstructive Pulmonary disease".

It is understood that the study will be conducted under your direction, in a total of 50 research participants, at Dept. of Respiratory Medicine, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "Impact of comorbidities on the spectrum of gram negative sepsis in ICU patients".

It is understood that the study will be conducted under your direction, in a total of 83 research participants, at Dept. of General Medicine, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

Dr. Vimal

The EC hereby approves the proposal entitled, "Prevalence of QTc prolongation among hypertensive patients and its association with other co-morbidities".

It is understood that the study will be conducted under your direction, in a total of 159 research participants, at Dept. of General Medicine, as per the submitted protocol.

Date of approval of the study: 08.06.2020

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 07/05/2020.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Current status and determinants of Micronutrient supplementation among cohort of children (3years): A Mixed Method study".

It is understood that the study will be conducted under your direction, in a total of 564 research participants, at Dept. of Community Medicine, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "A Prospective Comparative study between Ligation of intersphincteric fistula tract (LIFT) and Conventional fistula surgery (Fistulectomy / Fistulotomy) for low anal fistula".

It is understood that the study will be conducted under your direction, in a total of 60 research participants, at Dept. of General Surgery, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Evaluation of peripapillary retinal nerve fiber layer thickness in myopia using optical coherence tomography".

It is understood that the study will be conducted under your direction, in a total of 88 research participants, at Dept. of Ophthalmology, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "A study on Post Covid glycemic status of Non- Diabetic patients".

It is understood that the study will be conducted under your direction, in a total of 50 research participants, at Dept. of General Medicine, as per the submitted protocol.

Date of approval of the study: 08/01/2022

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 07/12/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "A prospective observational study comparing doxorubicin with cyclophosphamide and epirubicin with cyclophosphamide regimen in breast cancer patients among south indian population".

It is understood that the study will be conducted under your direction, in a total of 70 research participants, at Dept. of Pharmacology, as per the submitted protocol.

Date of approval of the study: 27/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 26/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "A study on Electrocardiogram (ECG) and Echocardiogram(ECHO) parameters of patients with non communicable diseases attending tertiary care hospital".

It is understood that the study will be conducted under your direction, in a total of 500 research participants, at Dept. of General Medicine, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Diagnostic accuracy of Sono-Elastography in evaluation of Thyroid nodules with histopathological correlation".

It is understood that the study will be conducted under your direction, in a total of 88 research participants, at Dept. of Radiodiagnosis, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "Expression of p16^{INK4a} in Squamous Cell Carcinoma of Head and Neck region".

It is understood that the study will be conducted under your direction, in a total of 54 research participants, at Dept. of Pathology, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

Mrs. Meenakshi
(Lay person)

The EC hereby approves the proposal entitled, "Intimate partner violence and assessment of suicidality, depression and anxiety in chronic and severely mentally ill patients".

It is understood that the study will be conducted under your direction, in a total of 156 research participants, at Dept. of Psychiatry, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "A cross sectional study on sleep disorders and effects of various sleep habits in children aged 4-12 years attending OPD in tertiary care centre".

It is understood that the study will be conducted under your direction, in a total of 228 research participants, at Dept. of Paediatrics, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Functional outcome of intramedullary interlocking nailing for tibial fractures by suprapatellar approach – a prospective study".

It is understood that the study will be conducted under your direction, in a total of 25 research participants, at Dept. of Orthopaedics, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

It is the policy of EC that, it be informed about any onsite serious adverse event or the unexpected adverse event report within 24 hours as per the formats specified in SOP 09/V2 to the EC or by email if there is holiday. The report of SAE or death after due analysis shall be forwarded by the Investigator to chairman of the EC and the head of the institution where the trial is been conducted within 10 calendar days of SAE or death.

In case of injury or death occurring trial subject the sponsor (whether a pharmaceutical company or an institution) or his representative, whosoever had obtained permission from the Licensing Authority for conduct of the clinical trial shall make payments for medical management of the subject and also provide financial compensation for the clinical trial related injury or death.

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25.01.2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "Utility of Capillary Blood Glucose and Temperature Monitoring with Non-Contact Thermometer for Assessment of Flap Viability".

It is understood that the study will be conducted under your direction, in a total of 54 research participants, at Dept. of General Surgery, as per the submitted protocol.

Date of approval of the study: 26/02/2021

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 25/01/2022.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

To

Ms. Karthika Devi. D. S,
Dept. of Community Medicine.

The study no. EC/33/2022 entitled, "Risk assessment of Diabetes among rural farmers using Indian Diabetic Risk score".

Dear Ms. Karthika Devi. D. S,

The EC has reviewed and approved the following documents submitted for the above mentioned clinical study.

1. Research Proposal (Section A to D)
2. Questionnaire
3. Consent form (Part I & II in English and Tamil)

The EC hereby approves the proposal entitled, "Risk assessment of Diabetes among rural farmers using Indian Diabetic Risk score".

It is understood that the study will be conducted under your direction, as per the submitted protocol.

Date of approval of the study: 19/08/2022

No deviations from, or changes of the protocol should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

The study no. EC/40/2022 entitled, "Does visual processing influence learning? A comparative study of visual evoked potential in slow and advance learners"

Dear Ms. Aiswarya. S. Ignatious,

The EC has reviewed and approved the following documents submitted for the above mentioned clinical study.

1. Research Proposal (Section A to D)
2. Consent form (Part I & II in English)

The EC hereby approves the proposal entitled, "Does visual processing influence learning? A comparative study of visual evoked potential in slow and advance learners".

It is understood that the study will be conducted under your direction, as per the submitted protocol.

Date of approval of the study: 17/08/2022

No deviations from, or changes of the protocol should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

The EC hereby approves the proposal entitled, "Integrating point-of-care ultrasound for evaluating patient presenting with Acute dyspnea to the Emergency department".

It is understood that the study will be conducted under your direction, in a total of 100 research participants, at Dept. of Emergency Medicine, as per the submitted protocol.

Date of approval of the study: 25/02/2022

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 24/01/2023.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

- **This study should be first done as a Pilot study at the Institute level, only after obtaining appropriate permissions from the administrators of the Institution.**

This will help in knowing the possible hurdles and conflicts, arising among the students and consultants invited through Google form. The collected data and the results of the Pilot study should be submitted to the administrators of the Institution and the Ethics Committee. Based on the pilot study's findings further approval can be decided by SMVMCH-EC to proceed with the study involving medical professionals and students from other institutes

However, the following points should be strictly incorporated in both the Pilot study and the Main study.

- The investigators have to explain why it is being done in Puducherry medical professionals alone and why not at national level.
- Mention clearly in the objective, whether the study will be done only in the respective institute or will be including other institutes.
- Sample size needs to be calculated to ensure sufficient number of participants have participated in the study and the findings are powered enough to claim the outcome. Having sample size will avoid both under and over recruitment of participants. Sample size needs to be calculated for individual groups namely UG, PG students, interns and consultants as the objective is to compare among these groups. Without sample size calculation it may not be possible to compare among the groups.
- The PI has to explain clearly the disciplines from which consultants and postgraduates will be invited to participate in the study.
- One of the queries asks how many homosexual patients you come across with option starting from less than 10. There are few disciplines which will be hardly coming across such patients or taking history regarding this will introduce bias towards the assessment of attitude and behavior.
- Actually, there is no benefit for the participants, as this is a cross sectional study.
- Age group of the participants should be strictly specified, preferably Major. Recruitment of the participants from first year MBBS students may have the possibility of including participants less than 18 years. Minors must be avoided, as it requires participants assent, and Parental consent.
- **The variable "Religion" should be strictly removed from the questionnaire.**
- **The variable "Employment Status-Government Vs Private" should be strictly removed from the questionnaire.**
- All the possible identifiers in the study should be removed.
- As it is a sensitive study, recruitment of the participants should be done with utmost care.
- Personal contact of the participants for enrolling in the study should be avoided.
- Strict confidentiality of the collected data should be maintained.

- **This study should be first done as a Pilot study, only after obtaining appropriate permissions from the administrators of the Institution.**

This will help in knowing the possible hurdles and conflicts, arising from recruiting the participants and handling the data. The collected data and the results of the Pilot study should be submitted to the administrators of the Institution and the Ethics Committee. Based on the pilot study's findings further approval can be decided by SMVMCH-EC to proceed with the main study.

However, the following points should be strictly incorporated in both the Pilot study and the Main study.

- The Principal Investigator needs to explain how they will be obtaining the details of the partners of participants. If the participant is not willing to reveal the partner details, it should be respected and should not be compelled to provide the details. The same needs to be included in Informed Consent Form.
- Similarly the PI needs to explain how the partner of the participant will be contacted after getting his details from the participant. Will they be interviewed through phone or will be invited to Psychiatry department of SMVMCH? If interview through phone, verbal consent to be taken which needs to be recorded and documented in the presence of a witness. If the participant is called to psychiatry department for participation, reimbursement needs to be given and the amount needs to be mentioned in the Informed Consent Form.
- Psychiatry morbidities need to be explained clearly with appropriate references. It needs to be explained using simple and understandable terms in the Informed Consent Form.
- The study is beneficial only for the participants with psychiatric morbidities attending psychiatry OPD. The Principal Investigator has to explain how it will be of any benefit to those partners of the participants who are otherwise healthy and do not have psychiatric morbidities. The mental health of those partners of the participants should be evaluated prior to the study and remedial measures should be taken.
- In Informed Consent Form under "what will happen if you participate": should include "that the partners information will be taken from the participants and this study is all about tracing homosexual men to know about their mental health and help them out"
- To remove female gender from the Proforma as this is done only in males.
- "Name" should be strictly removed from the Proforma.
- All the possible identifiers in the study should be removed.
- Compulsion of the participants for enrolling in the study should be avoided.
- Strict confidentiality of the collected data should be maintained.

The EC hereby approves the proposal entitled, "Cervical cancer screening results and follow up status of women screened at Rural Health Training Centre, Thiruvannainallur, Tamil Nadu- A Follow up study".

It is understood that the study will be conducted under your direction, at Dept. of Community Medicine, as per the submitted protocol.

Date of approval of the study: 03/03/2022

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 02/02/2023.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "Experiences of medical students in COVID home triage – An exploratory qualitative study in urban Puducherry".

It is understood that the study will be conducted under your direction, in a total of 40 participants, at Dept. of Community Medicine, as per the submitted protocol.

Date of approval of the study: 07/03/2022

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 06/02/2023.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

The EC hereby approves the proposal entitled, "An interprofessional approach on planning, implementation and evaluation of a community driven and owned program for advocacy, communication and social mobilization of NTEP goals in suburban and rural areas of Puducherry".

It is understood that the study will be conducted under your direction, in a total of 370 participants, at Dept. of Community Medicine, as per the submitted protocol.

Date of approval of the study: 07/03/2022

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 06/02/2023.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours

The EC hereby approves the proposal entitled, "Association of genetic polymorphism of TCF7L2 gene among Gestational Diabetes Mellitus Subjects of South India".

It is understood that the study will be conducted under your direction, in a total of 90 participants, at Dept. of Biochemistry, as per the submitted protocol.

Date of approval of the study: 07/03/2022

No deviations from, or changes of the protocol and Informed Consent Document should be initiated without prior written approval by the EC of an appropriate amendment. The EC expects that the investigator should promptly report to the EC any deviations from, or changes of, the protocol to eliminate immediate hazards to the research participants and about any new information that may affect adversely the safety of the research participants or the conduct of the trial.

This approval is valid for the entire duration of the study. A copy of the final report should be submitted to the EC for review. But for studies which will continue for more than a year, a continuing review report needs to be submitted (within 1 month of the due date i.e. 11 months from the date of approval) on or before 06/02/2023.

The EC functions in accordance with ICH GCP, Schedule Y, ICMR guidelines and other applicable regulatory requirements.

Sincerely yours
