

**RURAL HEALTH TRAINING CENTRE
THIRUVENNAINALLUR
ANNUAL REPORT (2022-2023)**

Dr. KAGNE. R.N
DEAN
SRI MANAKULA VINAYAGAR
MEDICAL COLLEGE & HOSPITAL
KALITHEERTHALKUPPAM,
PUDUCHERRY-605107.

The major activities of the Centre are –

1. OPD at Centre
2. Rural Mobile Clinic in four villages
3. Physiotherapy unit
4. Specialist visits
5. Counselling OPD
6. Internship and Nurses Training Program
7. Laboratory investigations
8. Activities under national health program
 - a) Non Communicable disease clinic
 - b) Cancer screening program
 - c) School Health Education Program
 - d) National Tuberculosis Elimination Program
9. Celebration of national health days
10. Community based palliative care program
11. RHTC Staff details with name and designation
12. Population covered by the centre

2.1 OPD at centre:

OPD runs every weekday from 8.30 am to 1 pm and then 2 pm to 8 pm. It receives laboratory support with basic investigations such as basic blood and urine examination, haemoglobin estimation, blood sugar, and serum cholesterol, blood urea etc. OPD is also supported by a counselling centre. It offers free treatment for minor ailments. The centre has a pharmacy attached to it. Patients who need referral are referred to our hospital or nearest government hospital at Villupuram. The details of the number of patients in each month are given below.

Dr. KAGNE. R.N
DEAN
SRI MANAKULA VINAYAGAR

2.2 Rural Mobile Clinic:

Among the most visible activities of RHTC, is 'Rural Mobile Clinic' (RMC) in the villages. During these clinics, Primary care for minor ailments is provided at village level. It is conducted from Tuesday to Friday (four days) during the morning hours on fixed days in the village. We have selected four villages within ten kilometre area. It is run by a team of medical interns, social worker and nursing staffs. No user fee is charged for the service. It provides an entry point for other health promotive and preventive activities in the village. It is an opportunity to build-up contact and faith among the villagers and to develop better understanding of the community among the staff of RHTC. It offers an opportunity to medical interns to educate patients in their social environment.

Objectives:

1. To ensure access to Primary health care to the villagers at their doorstep.
2. To ensure interaction of medical interns and postgraduate students with the local community.

2.5 Counselling OPD

Counselling of patients is done for non-communicable disease like diabetes, hypertension, anaemia etc. by medical interns, postgraduates, medical officer and social worker.

Photograph 2.6: Counselling services

2.6 Internship Training Program:

We post our medical interns at RHTC for field exposure. Medical interns are given 'Internship card' to document their daily activities under the supervision of medical officers and Postgraduate in Community Medicine. Medical Interns have to work in centre OPD, Rural Mobile Clinic, participate in health education program and weekly academic program where we cover treatment guidelines and National Health Program. Interns' academic activities are held at RHTC on afternoon. They are given the topic of standard treatment guidelines of common conditions developed by the ministry of health and family welfare, India, which are relevant to their day to day practice. The discussion was facilitated by faculties and post graduate from the Community Medicine department.

b) Screening program for breast cancer and cervical cancer

Every Friday a team of assistant professor from Community Medicine and OBG, post graduates, interns, social workers and ANM conduct cancer screening program. The screening for breast and cervical cancer is done for the women above 30 years of age from the field practice area of RHTC. Breast cancer screening is done by physical examination and cervical cancer screening is done by Pap smear in collaboration with Department of Pathology. Along with the screening of breast and cervical cancer, women are also screened and treated for Sexually Transmitted Diseases. Partner treatment is also done with help of social workers. Also basic anthropometric measurements and blood examinations (Hb, blood glucose) are done for all the women. Totally 107 patients were screened last year. Out of that nilwere diagnosed to have carcinoma cervix and 1 were diagnosed to have pre invasive lesion.

a) School health education program

In order to promote health awareness among students, schools were identified in the villages of field practicing areas of RHTC. Every month on a particular topic health education and awareness was provided by a team of Assistant Professor, Health

Educator, Medical Social Worker, Post Graduate and Medical Interns in 4 Government schools namely 1) Government Elementary school - Kerimedu, 2) KGBV school - Andrayanallur, 3) KGBV school - Thiruvannainallur, 4) Government high school - Edaiyar, 5) Government high school - Periyasevalli. This activity helps generate awareness among students and in training medical interns.

b) National Tuberculosis Elimination Program (NTEP):

Our centre functions as a Non-designated Microscopy centre. Our centre health inspector goes to the field and collects sputum samples from Tuberculosis suspects on a regular basis. Both active and passive surveillance for Tuberculosis is being done.

2.13 Community based Palliative care program

In order to utilise the trained manpower and resources, we planned to initiate community based palliative care services in the field practice areas (four villages) of our Rural Health Training Center. We have signed an MoU with Scope India for the providing support for community mobilisation activities and nursing care for people who need palliative care under the National Rural Health Mission.

Celebration of days of Public Health Importance:
REPORT ON HOOKWORM AWARENESS ON 01/04/2022:

Venue: Sirumadhurai

Date: 1/4/22 Time: 10:00am – 11:00am.

Faculty:

D.S Karthika Devi (CRRI)

Kasivishwanathan (CRRI)

Mrs. Jayanthi (MSW)

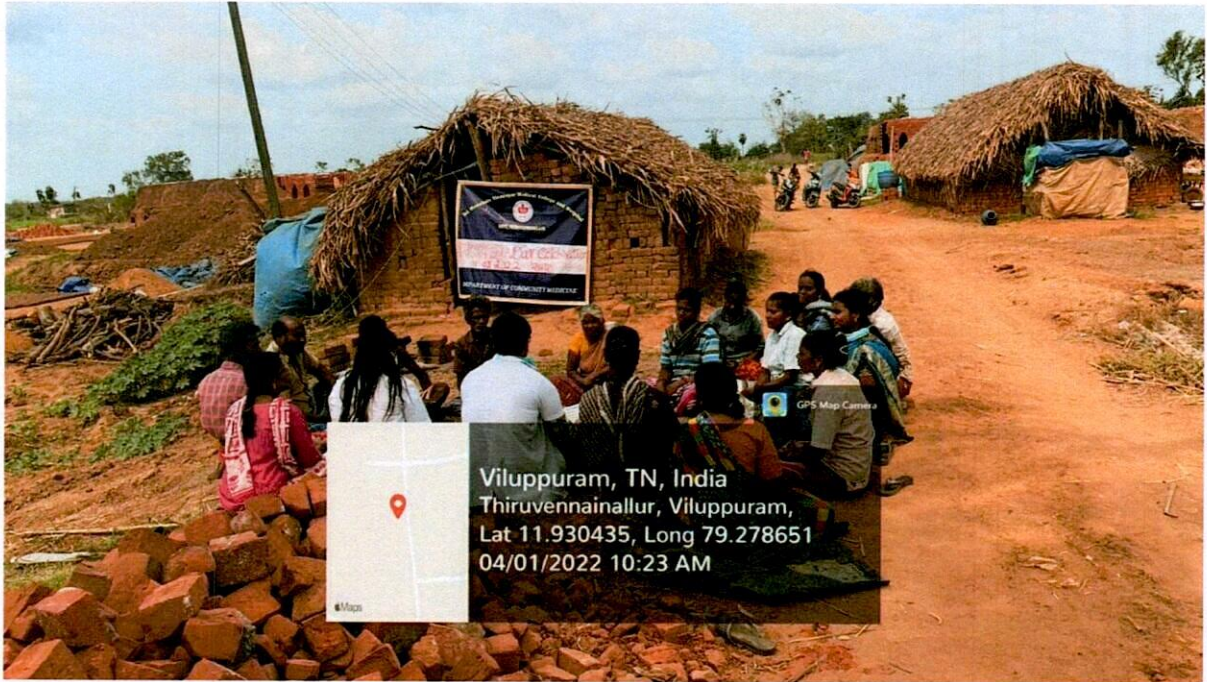

Mrs. Geetha (Lab technician)

As the world health day falls on APRIL 7TH, the doctors of SMVMCH planned an awareness programme on topic “Hookworm awareness among kiln and agricultural workers”. As the kiln workers also worked in agricultural activities, they were our target population.

The programme started with the introduction to hookworm, its prevalence among bare foot workers, pathogenesis, mode of transport, signs and symptoms, investigation, prevention and treatment as explained by showing practical pictures in an iPad by D.S Karthika Devi. The participants were eager to listen as the topic provoked their felt need and interest, and they eagerly asked questions to the speaker. Doubts were cleared then and there. The programme was a good group discussion conducted out in a public common spot with 15 participants.

As the world health day’s 2022 motto goes as “Our planet our health” so was the programme conducted in an interactive way. The participants thanked the speaker at the end; vote of thanks given by Mrs. Jayanthi.
