

Medical Education Unit Feedback report

from various stakeholders(2021-2022)

The College council in our institution is involved in collecting regular feedback from students across all the four professional years. The feedback are obtained through the Medical Education Unit at the end of each professional year with the help of feedback forms designed to capture information about four major components namely, teaching, teachers, educational environment and infrastructure available on a five point Likert scale, Strongly Agree, Agree, Uncertain, Disagree and Strongly Agree. The results for each variable are expressed in frequencies and percentages. We calculated consensus score for each item and a score of more than 80% is considered to be good. Each component has five questions. We also obtain suggestions for further improvement. We follow anonymous data collection and maintain confidentiality of the data obtained.

At the end of first professional year, we collected feedback from 134 students. For the feedback about teaching, we obtained a score of 85% for lectures being regularly conducted, 79% for practical classes being regularly conducted and 78% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score was 80% for teachers being well prepared for the class. Under educational environment, consensus score for good support system for students and sports and cultural activities conducted regularly were 68% and 66% respectively. The students were happy with the infrastructure and the consensus score was 81%.

At the end of second professional year, we collected feedback from 122 students. For the feedback about teaching, we obtained a score of 85% for lectures being regularly conducted, 77% for practical classes being regularly conducted and 78% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score for teachers being well prepared for the class and good communication skills of teachers were 76% and 74% respectively. Under educational environment consensus score for conducive environment to concentrate and good support system for students and sports and cultural activities conducted regularly were 66% and 47% respectively. The students were happy with the infrastructure and the consensus score was 72%.

We collected feedback from 96 students at the end of third professional year using the same format of feedback forms. We found that the consensus score was 79% for lectures being regularly conducted. Regarding feedback about teachers, the consensus score for teachers being regular for their class and being well prepared for the class were 80% and 76% respectively. Under educational environment, consensus score for conducive environment to concentrate was 62% respectively. The students were happy with the infrastructure and the consensus score was 63%.

Ninety two students contributed to the feedback collected at the end of fourth professional year. We found that the consensus score was 68% for community based learning and it was 84% for clinical cases being adequately discussed. The students expressed satisfaction about the knowledge of teachers and for being well prepared for classes.

Medical education unit
Feedback report from various stakeholders (2020-2021)

The college council in our institution is involved in collecting regular feedback from students across all the four professional years. The feedback are obtained through the medical education unit at the end of each professional year with the help of feedback forms designed to capture information about four major components namely, teaching, teachers, educational environment and infrastructure available on a five point Likert scale, strongly agree, agree, uncertain, disagree and strongly disagree. The results for each variable are expressed in frequencies and percentages. We calculated consensus score for each item and a score of more than 80% is considered to be good. Each component has five questions. We also obtain suggestions for further improvement. We follow anonymous data collection and maintain confidentiality of the data obtained.

At the end of first professional year, we collected feedback from 140 students. For the feedback about teaching, we obtained score of 85% for lectures being regularly conducted, 80% for practical classes being regularly conducted and 79% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score was 80% for teachers being well prepared for the class. Under educational environment, consensus score for good support system for students and sports and cultural activities conducted regularly were 69% and 67% respectively. The students were happy with the infrastructure and the consensus score was 81%.

At the end of second professional year, we collected feedback from 120 students. For the feedback about teaching, we obtained a score of 86% for lectures being regularly conducted, 78% for practical classes being regularly conducted and 79% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score for teachers being well prepared for the class and good communication skills of teachers were 77% and 75% respectively. Under educational environment, consensus score for conducive environment to concentrate and good support system for students and sports and cultural activities conducted regularly were 68% and 48% respectively. The students were happy with the infrastructure and the

Consensus score was 72%.

We collected feedback from 94 students at the end of third professional year using the same

format of feedback forms, we found that the consensus score was 79% for lectures being regularly conducted.

Regarding feedback about teachers, the consensus score for teachers being regular for their class and being well prepared for the class were 80% and 76% respectively. Under educational environment, consensus score for conducive environment to concentrate was 62% respectively. The students were happy with the infrastructure and the consensus score was 64%.

Ninety students contributed to the feedback collected at the end of fourth professional year. we found that the consensus score was 68% for community based learning and it was 84% for clinical cases being adequately discussed. The students expressed satisfaction about the knowledge of teachers and for being well prepared for classes.

Medical Education Unit

Feedback report from various stakeholders (2019-2020)

The College council in our institution is involved in collecting regular feedback from students across all the four professional years. The feedback are obtained through the Medical Education Unit at the end of each professional year with the help of feedback forms designed to capture information about four major components namely, teaching, teachers, educational environment and infrastructure available on a five point Likert scale, Strongly Agree, Agree, Uncertain, Disagree and Strongly Agree. The results for each variable are expressed in frequencies and percentages. We calculated consensus score for each item and a score of more than 80% is considered to be good. Each component has five questions. We also obtain suggestions for further improvement. We follow anonymous data collection and maintain confidentiality of the data obtained.

At the end of first professional year, we collected feedback from 129 students. For the feedback about teaching, we obtained a score of 86% for lectures being regularly conducted, 78% for practical classes being regularly conducted and 77% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score was 81% for teachers being well prepared for the class. Under educational environment, consensus score for good support system for students and sports and cultural activities conducted regularly were 68% and 68% respectively. The students were happy with the infrastructure and the consensus score was 80%.

At the end of second professional year, we collected feedback from 117 students. For the feedback about teaching, we obtained a score of 85% for lectures being regularly conducted, 79% for practical classes being regularly conducted and 79% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score for teachers being well prepared for the class and good communication skills of teachers were 78% and 76% respectively. Under educational environment, consensus score for conducive environment to concentrate and good support system for students and sports and cultural activities conducted regularly were 65% and 57% respectively. The students were happy with the infrastructure and the consensus score was 71%.

We collected feedback from 90 students at the end of third professional year using the same format of feedback forms. We found that the consensus score was 74% for lectures being regularly conducted. Regarding feedback about teachers, the consensus score for teachers being regular for their class and being well prepared for the class were 80% and 78% respectively. Under educational environment, consensus score for conducive environment to concentrate was 66% respectively. The students were happy with the infrastructure and the consensus score was 63%.

Ninety one students contributed to the feedback collected at the end of fourth professional year. We found that the consensus score was 66% for community based learning and it was 78% for clinical cases being adequately discussed. The students expressed satisfaction about the knowledge of teachers and for being well prepared for classes.

Medical Education Unit

Feedback report from various stakeholders (2018-2019)

The College council in our institution is involved in collecting regular feedback from students across all the four professional years. The feedback are obtained through the Medical Education Unit at the end of each professional year with the help of feedback forms designed to capture information about four major components namely, teaching, teachers, educational environment and infrastructure available on a five point Likert scale, Strongly Agree, Agree, Uncertain, Disagree and Strongly Agree. The results for each variable are expressed in frequencies and percentages. We calculated consensus score for each item and a score of more than 80% is considered to be good. Each component has five questions. We also obtain suggestions for further improvement. We follow anonymous data collection and maintain confidentiality of the data obtained.

At the end of first professional year, we collected feedback from 123 students. For the feedback about teaching, we obtained a score of 85% for lectures being regularly conducted, 78% for practical classes being regularly conducted and 77% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score was 79% for teachers being well prepared for the class. Under educational environment, consensus score for good support system for students and sports and cultural activities conducted regularly were 68% and 66% respectively. The students were happy with the infrastructure and the consensus score was 78%.

At the end of second professional year, we collected feedback from 114 students. For the feedback about teaching, we obtained a score of 84% for lectures being regularly conducted, 78% for practical classes being regularly conducted and 78% for adequate hands-on training being given to students. Regarding feedback about teachers, the consensus score for teachers being well prepared for the class and good communication skills of teachers were 77% and 75% respectively. Under educational environment, consensus score for conducive environment to concentrate and good support system for students and sports and cultural activities conducted regularly were 68% and 63% respectively. The students were happy with the infrastructure and the consensus score was 71%.

We collected feedback from 88 students at the end of third professional year using the same format of feedback forms. We found that the consensus score was 74% for lectures being regularly conducted. Regarding feedback about teachers, the consensus score for teachers being regular for their class and being well prepared for the class were 80% and 77% respectively. Under educational environment, consensus score for conducive environment to concentrate was 62% respectively. The students were happy with the infrastructure and the consensus score was 63%.

Eighty seven students contributed to the feedback collected at the end of fourth professional year. We found that the consensus score was 65% for community based learning and it was 77% for clinical cases being adequately discussed. The students expressed satisfaction about the knowledge of teachers and for being well prepared for classes.

Based on the feedback received from the students, the College council took up most pressing issues from to time and actions taken to address them. Here are some of the actions taken.

Action report 2020

s.no	Problems identified	Actions taken
1	Need for feedback on students performance	Informed all HODs through College Council To incorporate feedback system
2	Less cultural activities for students	Number of days for cultural events extended and organizing responsibility handed over to students
3	To make more small group teachings	Informed Dean academic and necessary changes were done
4	Simulation based teaching can be introduced	Well equipped simulation lab has been set up.
5	Classrooms are uncomfortable due to High temperatures	Centralized air-conditioning facility has been done
6	To dedicate more time for clinical postings	Revision of time table has been made to make sure more time is available during Clinical postings to learn from patients
7	Clinical postings can be broken into smaller groups	All departments initiated the culture of Conducting clinics in small groups with active participation.
8	To promote learning of slow learners	College council requested all HODs to Conduct additional sessions for slow learners

Feedback from Parents

The feedback from parents was obtained with the help of feedback forms mailed to their individual mail id s and sent through students for those who could not access mail. The form consisted of 15 items and was created in consensus with administrators, College council and expert opinion from consultants. The items covered different areas including the admission procedure, infrastructure, assessment and feedback system for students, learning environment, support system and extra-curricular activities. The parents were requested to rate their satisfaction on a five point Likert scale, Excellent, Very Good, Good, Average, Poor and Not Applicable. We received feedback from 230 parents. Forty nine percentage of the parents rated the CENTAC admission procedure as “Good”, followed by 28% as “Very good”. Around 49% of the parents were satisfied with the infrastructure including lab facilities, canteen, ICT facilities and transport facilities. Another 36% of parents felt that the college had “good” counselling and guidance for students, good assessment and feedback system. Academic discipline was rated as “Excellent” by 28% of the parents. The facilities which needed improvement were hostel and canteen facilities.

Feedback about Employee

As a part of the feedback system existing in our institution, we routinely collect feedback of students (undergraduates and postgraduates) from the employers (preferably the head of the institution/ head of the department) across various institutions in India (private/government) where the student is placed after passing out. The feedback are collected through online feedback forms on 13 items using a five point Likert scale, Excellent, Very Good, Good, Average and Poor. We collected feedback for about sixty three students who are employed or studying in different institutions in India and confidentiality of the data are maintained. Some of the key findings of the analysis are presented below in frequencies and percentages. The ability to contribute to the goal of the organization was rated as "Very good" for 42% followed by "Excellent" for 9% of the employees and "Good" for 44%. Majority of students were rated to have "Good" planning and organization skills. Forty six percentage of students had "Good" communication skills. The ability to solve workplace problems was rated as "Good" for 58% of the students. Innovativeness and creativity was rated "Good" for 56% students. Involvement in social activities was rated as "Good" for 47% of the students. Forty five percentage of the students were rated to have "Very good" respect for values in life.

Feedback from Teachers

The process of receiving feedback from faculty at SMVMCH began with developing online google forms for easy administration and anonymous feedback collection. The form consisted of 15 items including satisfaction regarding course syllabus, teaching-learning methods, freedom to make innovations in teaching, infrastructure available and assessment methods. The items were generated based on consensus with administrators, College council and expert opinion. Each item was rated on a five point Likert scale from "Strongly Agree" through "Neither Agree nor Disagree" to "Strongly Disagree". The link for the google form so created was mailed to the personal email id s of individual faculty.

The results were summarized based on the responses provided and presented in frequencies and percentages. More than 40% of the faculty were very satisfied with three items namely: "the course/syllabi of the subjects taught by me increased my interest, knowledge and perspective in the subject area, tests and examinations are conducted well in time with proper coverage of all units in the syllabus and the college has given me full freedom to adopt new techniques / strategies of teaching such as group discussions, seminar presentations and learners' participation".

Around 75% of the faculty rated as "Agree" for the courses / syllabi taught to have a good balance between theory and application, 67% for well-defined objectives of the syllabi and 62% of the faculty felt that the books/journals etc. prescribed / listed as reference materials were relevant, updated and covered the entire syllabi. Around half of them reported that they had adequate freedom to adopt new techniques/strategies of testing and assessment of students, teacher friendly administration, adequate opportunities and support being provided to faculty members for upgrading their skills and qualifications and good ICT facilities in the college. A few percentage of the faculty expressed dissatisfaction about the canteen and washroom facilities.

Professional Feedback Report: 2021-22

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar Medical College and Hospital, in association with the every department of the college collects professional feedback on curriculum and the method of conduct of exams in our college. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. All the examiners were given an opportunity to rate the curriculum and the facilities provided by the college.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the mode of conduct of exam, recent updates in the curriculum and the infrastructure of the college

The professional feedback of the academic year 2021-22 was analyzed and it is given below. The views and opinions of the professionals about the curriculum in detail and the various facilities provided by the college are measured in a descriptive manner. The questionnaire contains 4 questions and each question is analyzed. 1) Relevance of the course and curriculum. Both the undergraduate and post graduate examiners were appreciating the adherence of our curriculum to both national and international standards. The relevance of the course and curriculum is rated highly by all the respondents. About 97% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 3% of the respondents rated it as average and none as poor. 2) Recent advancements added in the curriculum. This question was given with a descriptive option. 98% of the responders were positive with all the examiners agreeing to the fact. The availability of all the recent techniques for diagnostic and treatment purpose was highly satisfactory. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%, very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. None of the respondents rated it as average and poor. 4) The mode of conduct of exam All the respondents (excellent 72%, very good 8% and good 20% respectively) have opined about the question on mode of conduct of exam as excellent. None of the respondents rated it as average and poor.

very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. Especially the culturals and simscon which is an educative conference which happens every year has kindled more innovative ideas in the wards at an very early stage. None of the respondents rated it as average and poor. 4) Influence of campus environment of the college in your life. All the respondents (excellent 72%, very good 8% and good 20% respectively) have opined about the question on influence of campus environment of the college in your life that the campus environment of the college has got tremendous influence on their life. None of the respondents rated it as average and poor. 5) Contribution of the college in the overall personality development. All the respondents' opinion about the question on the contribution of the college in the overall personality development (excellent 58%, very good 21% and good 21 %) is thatthe college has contributed well in to the overall personality development. None of the respondents rated it as average and poor. 6) Syllabus was job oriented. About 75% of the respondents (excellent 40%, very good 25%, and good 10%) responded positively to this question and opined that the syllabus was extremely job oriented. Only 15% rated it as average, and another 10% as poor. 7) Infrastructure and facilities provided by the college. Various suggestions to improve the hostel facilities with latest technology were also welcomed whole heartedly. All the respondents (excellent 85%, very good 10% and good 5%) responded positively to the question about infrastructure and facilities provided by the college and opined that the infrastructure and facilities provided by the college is extremely good. None of the respondents rated it as average and poor. 8) Mentorship programme was highly rated by all the responders with a maximum of 95% expressing their agreement towards it.

Alumni Feedback Report: 2021-22

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar Medical College and Hospital, in association with the alumni associations of the college collects alumni feedback on syllabus and the facilities provided by the college annually. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. The members of the alumni associations were given an opportunity to rate the syllabus and the facilities provided by the college on a five scale measurement.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the functional nature of the course, the co-curricular activities in the college, effectiveness of the mentorship program, opportunities of improvement, possibility of skill development program and the influence of campus environment of the college in their life. It also tries to evaluate the contribution of the college in their overall personality development, the career orientation of the syllabus, and also the infrastructure and facilities provided by the college.

The alumni feedback of the academic year 2021-22 was analyzed and it is given below. Efficiency of the syllabus, influence of the college on the development and availability of the facilities were the most pressing issues which was discussed in the feedback. The views and opinions of the alumni about the syllabus in detail and the various facilities provided by the college are measured in the five point scale (1-excellent, 2-very good, 3- good, 4-average, 5-poor). The questionnaire contains 9 questions and each question is analyzed. 1) Relevance of the course and curriculum. The relevance of the course and curriculum is rated highly by all the respondents. About 94% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 6% of the respondents rated it as average and none as poor. 2) The things that you would appreciate most about this institute. This question was given with a descriptive option. The vast knowledge of experience and clinical exposure was appreciated by 96% of the responders. Friendly environment and effective support system was also brought into notice by 85% of the responders. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%,

Based on the feedback received from the students, the college council took up most pressing issues from time to time and actions taken to address them. Here are some of the actions taken.
actionreport2020

s.no	Problems identified	Actions taken
1	Need for feedback on students performance	Informed all hods through college council To incorporate feedback system
2	Less cultural activities for students	number of days for cultural events extended and organizing responsibility handed over to students
3	To make wi fi facility available for students	Informed dean
4	Lack of support system for students	Students council was formed
5	Classrooms are uncomfortable due to High temperatures	Centralized air conditioning facility has been done
6	To dedicate more time for clinical postings	revision of time table has been made to make sure more time is available during clinical postings to learn from patients
7	To include seminars	All departments initiated the culture of Students seminar
8	To promote learning of slow learners	College council requested all hods to Conduct additional sessions for slow learners

Feedback from parents

The feedback from parents was obtained with the help of feedback forms mailed to their individual mail ids and sent through students for those who could not access mail. The form consisted of 15 items and was created in consensus with administrators, college council and expert opinion from consultants. The items covered different areas including the admission procedure, infrastructure, assessment and feedback system for students, learning environment, support system and extra-curricular activities. The parents were requested to rate their satisfaction on a five point Likert scale, excellent, very good, and good, average, poor and not applicable. We received feedback from 240 parents. Forty nine percentage of the parents rated the centac admission procedure as "good", followed by 28% as "very good". Around 49% of the parents were satisfied with the infrastructure including lab facilities, canteen, ict facilities and transport facilities. Another 36% of parents felt that the college had "good" counselling and guidance for students, good assessment and feedback system. Academic discipline was rated as "excellent" by 28% of the parents. The facilities which needed improvement were hostel and canteen facilities.

Feedback from employers

As a part of the feedback system existing in our institution, we routinely collect feedback of students (undergraduates and postgraduates) from the employers (preferably the head of the institution/ head of the department) across various institutions in India (private/government) where the student is placed after passing out. the feedback are collected through online feedback forms on 13 items using a five point Likert scale, excellent, very good, good, average and poor. We collected feedback for about sixty three students who are employed or studying in different institutions in India and confidentiality of the data are maintained. Some of the key findings of the analysis are presented below in frequencies and percentages. The ability to contribute to the goal of the organization was rated as "very good" for 42% followed by "excellent" for 9% of the employees and "good" for 44%. Majority of students were rated to have "good" planning and organization skills. Forty six percentage of students had "good" communication skills. The ability to solve workplace problems was rated as "good" for 58% of the students. Innovativeness and creativity was rated "good" for 56% students. Involvement in social activities was rated as "good" for 47% of the students. Forty five percentage of the students were rated to have "very good" respect for values in life.

Feedback from teachers

The process of receiving feedback from faculty at smvmch began with developing online google forms for easy administration and anonymous feedback collection. The form consisted of 15 items including satisfaction regarding course syllabus, teaching-learning methods, freedom to make innovations in teaching, infrastructure available and assessment methods. The items were generated based on consensus with administrators, college council and expert opinion. Each item was rated on a five point Likert scale from "strongly agree" through "neither agree nor disagree" to "strongly disagree". The link for the google form so created was mailed to the personal email id s of individual faculty.

The results were summarized based on the responses provided and presented in frequencies and Percentage. more than40% of the faculty were very satisfied with three items namely: "the course/syllabi of the subjects taught by me increased my interest, knowledge and perspective in the subject area, tests and examinations are conducted well in time with proper coverage of all units in the syllabus and the college has given me full freedom to adopt new techniques / strategies of teaching such as group discussions, seminar presentations and learners' participation".

around 75% of the faculty rated as "agree" for the courses / syllabi taught to have a good balance between theory and application, 67% for well-defined objectives of the syllabi and 62% of the faculty felt that the books/journals etc. prescribed / listed as reference materials were relevant,updatedandcoveredtheentiresyllabi.aroundhalfofthemreportedthattheyhadadequatefreedom to adopt new techniques/strategies of testing and assessment of students, teacher friendlyadministration,adequateopportunitiesandsupportbeingprovidedtofacultymembersforupgrading their skills and qualifications and good ict facilities in the college. a few percentage of the faculty expressed dissatisfaction about the canteen and washroom facilities.

Feedback obtained from teachers (n=180)

s.no	variables	Strongly Agree n (%)	Agree n (%)	Neither Agree Nor Disagree n (%)	disagree n (%)	Strongly Disagree n (%)

Professional Feedback Report: 2020-2021

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar Medical College and Hospital, in association with the every department of the college collects professional feedback on curriculum and the method of conduct of exams in our college. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. All the examiners were given an opportunity to rate the curriculum and the facilities provided by the college.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the mode of conduct of exam, recent updates in the curriculum and the infrastructure of the college

The professional feedback of the academic year 2020-21 was analyzed and it is given below. The views and opinions of the professionals about the curriculum in detail and the various facilities provided by the college are measured in a descriptive manner. The questionnaire contains 4 questions and each question is analyzed. 1) Relevance of the course and curriculum. The relevance of the course and curriculum is rated highly by all the respondents. About 84% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 16% of the respondents rated it as average and none as poor. 2) Recent advancements added in the curriculum. This question was given with a descriptive option. 86% of the responders were positive with all the examiners agreeing to the fact. By using their knowledge they were able to progress in their career and come up to great heights. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%, very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. None of the respondents rated it as average and poor. 4) The mode of conduct of exam All the respondents (excellent 85%, very good 5% and good 10% respectively) have opined about the question on mode of conduct of exam as excellent. None of the respondents rated it as average and poor.

Alumni Feedback Report: 2020-2021

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar Medical College and Hospital, in association with the alumni associations of the college collects alumni feedback on syllabus and the facilities provided by the college annually. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. The members of the alumni associations were given an opportunity to rate the syllabus and the facilities provided by the college on a five scale measurement.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the functional nature of the course, the co-curricular activities in the college, effectiveness of the mentorship program, opportunities of improvement, possibility of skill development program and the influence of campus environment of the college in their life. It also tries to evaluate the contribution of the college in their overall personality development, the career orientation of the syllabus, and also the infrastructure and facilities provided by the college.

The alumni feedback of the academic year 2020-21 was analyzed and it is given below. The views and opinions of the alumni about the syllabus in detail and the various facilities provided by the college are measured in the five point scale (1-excellent, 2-very good, 3- good, 4-average, 5-poor). The questionnaire contains 9 questions and each question is analyzed. 1) Relevance of the course and curriculum. The relevance of the course and curriculum is rated highly by all the respondents. About 95% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 5% of the respondents rated it as average and none as poor. 2) The things that you would appreciate most about this institute. This question was given with a descriptive option. The vast knowledge of experience and clinical exposure was appreciated by 90% of the responders. Friendly environment and effective support system was also brought into notice by 85% of the responders. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%, very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. None of the respondents rated it as average and poor. Regular conduct of these activities have incorporated a sense of unity and leadership qualities in their life which has greatly helped them. 4) Influence of campus environment of the college in your life. All the respondents (excellent 72%, very good 8% and good 20% respectively) have opined about the question on influence of campus environment of

Based on the feedback received from the students, the College council took up most pressing issues from to time and actions taken to address them. Here are some of the actions taken.

Action report 2019

s.no	Problems identified	Actions taken
1	To promote learning of advanced learners	College council requested all HODs to conduct additional sessions for advanced learners
2	Less cultural and sports activities for students	Number of days for cultural events extended and organizing responsibility handed over to students
3	To make wi fi facility available for students	Informed Dean
4	Lack of support system for students	Students council was formed
5	Include seminars by faculties from outside institution	All departments initiated the culture of inviting resource person for seminar from outside.
6	To dedicate more time for clinical postings	Revision of time table has been made to make sure more time is available during clinical postings to learn from patients
7	To promote learning of slow learners	College council requested all HODs to conduct additional sessions for slow learners

Feedback from Parents

The feedback from parents was obtained with the help of feedback forms mailed to their individual mail id s and sent through students for those who could not access mail. The form consisted of 15 items and was created in consensus with administrators, College council and expert opinion from consultants. The items covered different areas including the admission procedure, infrastructure, assessment and feedback system for students, learning environment, support system and extra-curricular activities. The parents were requested to rate their satisfaction on a five point Likert scale, Excellent, Very Good, Good, Average, Poor and Not Applicable. We received feedback from 235 parents. Fifty one percentage of the parents rated the CENTAC admission procedure as “Good”, followed by 29% as “Very good”. Around 48% of the parents were satisfied with the infrastructure including lab facilities, canteen, ICT facilities and transport facilities. Another 40% of parents felt that the college had “good” counselling and guidance for students, good assessment and feedback system. Academic discipline was rated as “Excellent” by 29% of the parents. The facilities which needed improvement were hostel and canteen facilities.

Feedback from employers

As a part of the feedback system existing in our institution, we routinely collect feedback of students (undergraduates and postgraduates) from the employers (preferably the head of the institution/ head of the department) across various institutions in India (private/government) where the student is placed after passing out. The feedback are collected through online feedback forms on 13 items using a five point Likert scale, Excellent, Very Good, Good, Average and Poor. We collected feedback for about seventy students who are employed or studying in different institutions in India and confidentiality of the data are maintained. Some of the key findings of the analysis are presented below in frequencies and percentages. The ability to contribute to the goal of the organization was rated as "Very good" for 44% followed by "Excellent" for 9% of the employees and "Good" for 43%. Majority of students were rated to have "Good" planning and organization skills. Forty six percentage of students had "Good" communication skills. The ability to solve workplace problems was rated as "Good" for 57% of the students. Innovativeness and creativity was rated "Good" for 55% students. Involvement in social activities was rated as "Good" for 46% of the students. Forty five percentage of the students were rated to have "Very good" respect for values in life.

Feedback from Teachers

The process of receiving feedback from faculty at SMVMCH began with developing online google forms for easy administration and anonymous feedback collection. The form consisted of 15 items including satisfaction regarding course syllabus, teaching –learning methods, freedom to make innovations in teaching, infrastructure available and assessment methods. The items were generated based on consensus with administrators, College council and expert opinion. Each item was rated on a five point Likert scale from “Strongly Agree” through “Neither Agree nor Disagree” to “Strongly Disagree”. The link for the google form so created was mailed to the personal email id s of individual faculty.

The results were summarised based on the responses provided and presented in frequencies and percentages. More than 40% of the faculty were very satisfied with three items namely: “the course/syllabi of the subjects taught by me increased my interest, knowledge and perspective in the subject area, tests and examinations are conducted well in time with proper coverage of all units in the syllabus and the college has given me full freedom to adopt new techniques / strategies of teaching such as group discussions, seminar presentations and learners' participation”.

Around 73% of the faculty rated as “Agree” for the courses / syllabi taught to have a good balance between theory and application, 68% for well defined objectives of the syllabi and 64% of the faculty felt that the books/journals etc. prescribed / listed as reference materials were relevant, updated and covered the entire syllabi. Around half of them reported that they had adequate freedom to adopt new techniques/strategies of testing and assessment of students, teacher friendly administration, adequate opportunities and support being provided to faculty members for upgrading their skills and qualifications and good ICT facilities in the college. A few percentage of the faculty expressed dissatisfaction about the canteen and washroom facilities.

Professional Feedback Report: 2019-2020

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar medical college and Hospital, in association with the every department of the college collects professional feedback on curriculum and the method of conduct of exams in our college. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. All the examiners were given an opportunity to rate the curriculum and the facilities provided by the college.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the mode of conduct of exam, recent updates in the curriculum and the infrastructure of the college

The professional feedback of the academic year 2021-22 was analyzed and it is given below. The views and opinions of the professionals about the curriculum in detail and the various facilities provided by the college are measured in a descriptive manner. The questionnaire contains 4 questions and each question is analyzed. 1) Relevance of the course and curriculum. Both the undergraduate and post graduate examiners were appreciating the adherence of our curriculum to both national and international standards. The relevance of the course and curriculum is rated highly by all the respondents. About 97% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 3% of the respondents rated it as average and none as poor. 2) Recent advancements added in the curriculum. This question was given with a descriptive option. 98% of the responders were positive with all the examiners agreeing to the fact. The availability of all the recent techniques for diagnostic and treatment purpose was highly satisfactory. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%, very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. None of the respondents rated it as average and poor. 4) The mode of conduct of exam All the respondents (excellent 72%, very good 8% and good 20% respectively) have opined about the question on mode of conduct of exam as good. None of the respondents rated it as average and poor.

TRUE COPY ATTESTED

knowledge of experience and clinical exposure was appreciated by 96% of the responders. Friendly environment and effective support system was also brought into notice by 85% of the responders. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%, very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. Especially the cultural and Simcon which is an educative conference which happens every year has kindled more innovative ideas in the wards at a very early stage. None of the respondents rated it as average and poor. 4) Influence of campus environment of the college in your life. All the respondents (excellent 72%, very good 8% and good 20% respectively) have opined about the question on influence of campus environment of the college in your life that the campus environment of the college has got tremendous influence on their life. None of the respondents rated it as average and poor. 5) Contribution of the college in the overall personality development. All the respondents' opinion about the question on the contribution of the college in the overall personality development (excellent 58%, very good 21% and good 21 %) is that the college has contributed well in to the overall personality development. None of the respondents rated it as average and poor. 6) Syllabus was job oriented. About 75% of the respondents (excellent 40%, very good 25%, and good 10%) responded positively to this question and opined that the syllabus was extremely job oriented. Only 15% rated it as average, and another 10% as poor. 7) Infrastructure and facilities provided by the college. Various suggestions to improve the hostel facilities with latest technology were also welcomed whole heartedly. All the respondents (excellent 85%, very good 10% and good 5%) responded positively to the question about infrastructure and facilities provided by the college and opined that the infrastructure and facilities provided by the college is extremely good. None of the respondents rated it as average and poor. 8) Mentorship programme was highly rated by all the responders with a maximum of 95% expressing their agreement towards it.

Alumni Feedback Report: 2019-2020

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar medical college and Hospital, in association with the alumni associations of the college collects alumni feedback on syllabus and the facilities provided by the college annually. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. The members of the alumni associations were given an opportunity to rate the syllabus and the facilities provided by the college on a five scale measurement.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the functional nature of the course, the co-curricular activities in the college, effectiveness of the mentorship program, opportunities of improvement, possibility of skill development program and the influence of campus environment of the college in their life. It also tries to evaluate the contribution of the college in their overall personality development, the career orientation of the syllabus, and also the infrastructure and facilities provided by the college.

The alumni feedback of the academic year 2021-22 was analyzed and it is given below. Efficiency of the syllabus, influence of the college on the development and availability of the facilities were the most pressing issues which was discussed in the feedback. The views and opinions of the alumni about the syllabus in detail and the various facilities provided by the college are measured in the five point scale (1-excellent, 2-very good, 3- good, 4-average, 5- poor). The questionnaire contains 9 questions and each question is analyzed. 1) Relevance of the course and curriculum. The relevance of the course and curriculum is rated highly by all the respondents. About 94% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 6% of the respondents rated it as average and none as poor. 2) The things that you would appreciate most about this institute. This question was given with a descriptive option. The vast

Based on the feedback received from the students, the College council took up most pressing issues from to time and actions taken to address them. Here are some of the actions taken.

Action report 2018

s.no	Problems identified	Actions taken
1	Need for feedback on students performance	Informed all HODs through College Council to incorporate feedback system
2	Less cultural activities for students	Number of days for cultural events extended and organizing responsibility handed over to students
3	To make wi fi facility available for students	Informed Dean
4	Lack of support system for students	Students council was formed
5	Classrooms are uncomfortable due to high temperatures	Centralised air conditioning facility has been done
6	To dedicate more time for clinical postings	Revision of time table has been made to make sure more time is available during clinical postings to learn from patients
7	To include seminars	All departments initiated the culture of students seminar
8	To promote learning of slow learners	College council requested all HODs to conduct additional sessions for slow learners

Feedback from Parents

The feedback from parents was obtained with the help of feedback forms mailed to their individual mail id s and sent through students for those who could not access mail. The form consisted of 15 items and was created in consensus with administrators, College council and expert opinion from consultants. The items covered different areas including the admission procedure, infrastructure, assessment and feedback system for students, learning environment, support system and extra-curricular activities. The parents were requested to rate their satisfaction on a five point Likert scale, Excellent, Very Good, Good, Average, Poor and Not Applicable. We received feedback from 230 parents. Forty nine percentage of the parents rated the CENTAC admission procedure as “Good”, followed by 28% as “Very good”. Around 40% of the parents were satisfied with the infrastructure including lab facilities, canteen, ICT facilities and transport facilities. Another 40% of parents felt that the college had “good” counselling and guidance for students, good assessment and feedback system. Academic discipline was rated as “Excellent” by 27% of the parents. The facilities which needed improvement were hostel and canteen facilities.

As a part of the feedback system existing in our institution, we routinely collect feedback of students (undergraduates and postgraduates) from the employers (preferably the head of the institution/ head of the department) across various institutions in India (private/government) where the student is placed after passing out. The feedback are collected through online feedback forms on 13 items using a five point Likert scale, Excellent, Very Good, Good, Average and Poor. We collected feedback for about sixty three students who are employed or studying in different institutions in India and confidentiality of the data are maintained. Some of the key findings of the analysis are presented below in frequencies and percentages. The ability to contribute to the goal of the organization was rated as "Very good" for 42% followed by "Excellent" for 8% of the employees and "Good" for 42%. Majority of students were rated to have "Good" planning and organization skills. Forty five percentage of students had "Good" communication skills. The ability to solve workplace problems was rated as "Good" for 56% of the students. Innovativeness and creativity was rated "Good" for 53% students. Involvement in social activities was rated as "Good" for 45% of the students. Forty five percentage of the students were rated to have "Very good" respect for values in life.

Feedback from Teachers

The process of receiving feedback from faculty at SMVMCH began with developing online google forms for easy administration and anonymous feedback collection. The form consisted of 15 items including satisfaction regarding course syllabus, teaching –learning methods, freedom to make innovations in teaching, infrastructure available and assessment methods. The items were generated based on consensus with administrators, College council and expert opinion. Each item was rated on a five point Likert scale from “Strongly Agree” through “Neither Agree nor Disagree” to “Strongly Disagree”. The link for the google form so created was mailed to the personal email id s of individual faculty.

The results were summarised based on the responses provided and presented in frequencies and percentages. More than 40% of the faculty were very satisfied with three items namely: “the course/syllabi of the subjects taught by me increased my interest, knowledge and perspective in the subject area, tests and examinations are conducted well in time with proper coverage of all units in the syllabus and the college has given me full freedom to adopt new techniques / strategies of teaching such as group discussions, seminar presentations and learners' participation”.

Around 72% of the faculty rated as “Agree” for the courses / syllabi taught to have a good balance between theory and application, 67% for well defined objectives of the syllabi and 62% of the faculty felt that the books/journals etc. prescribed / listed as reference materials were relevant, updated and covered the entire syllabi. Around half of them reported that they had adequate freedom to adopt new techniques/strategies of testing and assessment of students, teacher friendly administration, adequate opportunities and support being provided to faculty members for upgrading their skills and qualifications and good ICT facilities in the college. A few percentage of the faculty expressed dissatisfaction about the canteen and washroom facilities.

Professional Feedback Report: 2018-2019

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar medical college and Hospital, in association with the every department of the college collects professional feedback on curriculum and the method of conduct of exams in our college. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. All the examiners were given an opportunity to rate the curriculum and the facilities provided by the college.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the mode of conduct of exam, recent updates in the curriculum and the infrastructure of the college

The professional feedback of the academic year 2021-22 was analyzed and it is given below. The views and opinions of the professionals about the curriculum in detail and the various facilities provided by the college are measured in a descriptive manner. The questionnaire contains 4 questions and each question is analyzed. 1) Relevance of the course and curriculum. The relevance of the course and curriculum is rated highly by all the respondents. About 94% of the respondents (excellent- 65%, very good-15% and good 15% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 6% of the respondents rated it as average and none as poor. 2) Recent advancements added in the curriculum. This question was given with a descriptive option. 98% of the responders were positive with all the examiners agreeing to the fact. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 85%, very good 10% and good 5% respectively) have opined that the activities of the college are extremely good. None of the respondents rated it as average and poor. 4) The mode of conduct of exam All the respondents (excellent 72%, very good 8% and good 20% respectively) have opined about the question on mode of conduct of exam as excellent. None of the respondents rated it as average and poor.

Alumni Feedback Report: 2018-2019

The Internal Quality Assurance Cell (IQAC) of the Sri Manakula Vinayagar medical college and Hospital, in association with the alumni associations of the college collects alumni feedback on syllabus and the facilities provided by the college annually. A specified sample is taken for the analysis. A well designed and structured questionnaire has been used to collect the responses. The members of the alumni associations were given an opportunity to rate the syllabus and the facilities provided by the college on a five scale measurement.

The objective of the feedback is to analyze the importance and relevance of the course and curriculum, the functional nature of the course, the co-curricular activities in the college, effectiveness of the mentorship program, opportunities of improvement, possibility of skill development program and the influence of campus environment of the college in their life. It also tries to evaluate the contribution of the college in their overall personality development, the career orientation of the syllabus, and also the infrastructure and facilities provided by the college.

The alumni feedback of the academic year 2021-22 was analyzed and it is given below. The views and opinions of the alumni about the syllabus in detail and the various facilities provided by the college are measured in the five point scale (1-excellent, 2-very good, 3-good, 4-average, 5-poor). The questionnaire contains 9 questions and each question is analyzed. 1) Relevance of the course and curriculum. The relevance of the course and curriculum is rated highly by all the respondents. About 92% of the respondents (excellent-83%, very good-10% and good 7% respectively) have rated the course and curriculum as relevant and extremely recommendable. Only 8% of the respondents rated it as average and none as poor. 2) The things that you would appreciate most about this institute. This question was given with a descriptive option. The vast knowledge of experience and clinical exposure was appreciated by 94% of the responders. Friendly environment and effective support system was also brought into notice by 92% of the responders. 3) Co-curricular activities in the college. The co-curricular activities in the college are analyzed and all the respondents (excellent 91%, very good 8% and good 1% respectively) have opined that the activities of the college are extremely good. None of the respondents rated it as average and poor. 4) Influence of campus environment of the college in your life. All the respondents (excellent 65%, very good 10% and good 25% respectively) have opined about the question on influence of campus environment of the college in your life that the campus environment of the college has got tremendous influence on their life. None of the respondents rated it as average and poor. 5) Contribution of the college in the overall personality development. All the respondents' opinion about the question on the contribution of the college in the overall personality development (excellent 58%, very good 21% and good 21 %) is that the college

TRUE COPY ATTESTED

has contributed well in to the overall personality development. None of the respondents rated it as average and poor. 6) Syllabus was job oriented. About 85% of the respondents (excellent 50%, very good 25%, and good 25%) responded positively to this question and opined that the syllabus was extremely job oriented. Only 15% rated it as average, and another 10% as poor. 7) Infrastructure and facilities provided by the college all the respondents (excellent 85%, very good 10% and good 5%) responded positively to the question about infrastructure and facilities provided by the college and opined that the infrastructure and facilities provided by the college is extremely good. None of the respondents rated it as average and poor. 8) Mentorship programme was highly rated by all the responders with a maximum of 95% expressing their agreement towards it.
