Sri MANAKULA VINAYAGAR Medical College and Hospital

Built environment with ramps/lifts with easy access to classrooms

Ramps for Accessibility: Our institution recognizes the importance of barrier-free access for disabled students. With this in mind, ramps have been strategically constructed throughout the campus, enabling individuals with mobility challenges to navigate between different areas with ease. These ramps are designed to meet accessibility standards, ensuring gentle slopes and appropriate width to accommodate wheelchairs, mobility aids, and pedestrians alike.

Lifts for Vertical Mobility: Vertical mobility within multi-story buildings is crucial for disabled students to access classrooms and facilities located on different floors. To address this need, lifts have been installed at key locations across the campus. These lifts are equipped with user-friendly controls and ample space to accommodate wheelchairs, ensuring that disabled students can move between floors independently and comfortably.

Easy Access to Classrooms: The implementation of ramps and lifts in our institution ensures that disabled students can seamlessly access classrooms, lecture halls, and other academic spaces. The ramps provide a gradual incline for easy traversal, while the lifts offer a convenient option for vertical movement. This comprehensive approach guarantees that disabled students can participate fully in classroom activities and academic pursuits without facing unnecessary physical barriers.

DISABLED FRIENDLY WASHROOMS

SMVMCH ensuring equal access and inclusion for individuals with disabilities is a fundamental aspect of creating a welcoming and supportive environment. Disabled-friendly washrooms are an integral component of this commitment, as they provide essential facilities that cater to the unique needs of people with disabilities. Such washrooms are designed to enhance comfort, privacy, and independence, fostering a more inclusive and respectful atmosphere for all.

Screen Reading Software (NV access)

Our institution is proud to employ the AICTE (All India Council for Technical Education) approved NV Access software to ensure an inclusive and accessible environment for all disabled students. This cutting-edge software, designed to enhance digital accessibility, plays a crucial role in providing equal opportunities and facilitating seamless interaction with digital content for individuals with visual impairments.

Key Features of NV Access Software:

1. **Screen Reader Functionality:** NV Access is equipped with advanced screen reader capabilities that enable visually impaired users to access and navigate digital content, including documents, websites, and applications. This functionality converts on-screen text into synthesized speech, allowing users to hear and comprehend the information.

2. **Braille Support:** The software also offers compatibility with refreshable Braille displays, empowering Braille readers to engage with digital content more effectively. This feature provides an additional layer of accessibility by offering tactile feedback.

3. **Keyboard Navigation:** NV Access software emphasizes keyboard-based navigation, enabling users to interact with software applications and online resources without the need for a mouse. This approach simplifies navigation and ensures a smoother user experience.

4. **Document and Web Browsing:** Users can seamlessly access and explore various digital documents, web pages, and online platforms using the NV Access software. The software's adaptive design optimizes content presentation, making it easier for visually impaired individuals to gather information.
