Podcast Title:

Series 1: Transforming with the Curriculum  
Episode 3: "Aligning with Appropriate Assessment"

Department: Medical Education Unit

Category: Continuing Medical Education

### TRANSCRIPT

Hello Everyone..... This is Dr.K.Soundariya, Coordinator, Medical Education Unit, Sri Manakula Vinayagar Medical College and Hospital. Happy to interact with you all in this final episode of the podcast series. In the previous episode, I discussed multiple "M" active learning strategies that align to Generation Z's preferences for interactive, technology-driven, and engaging learning experiences. In this episode I will discuss about aligning with the transforming curricula with appropriate assessment strategies.

#### 1. Authentic Assessments

Assessments that mimic the real world situations need to be created to evaluate the learner's ability to react in different contexts

#### 2. Anchored Assessments

The authentic assessments can be anchored with specific contextual based case scenarios

#### 3. Appraisal by Peers

It is essential to provide a collaborative learning environment through peer assessment where learners assess and provide feedback on their peer's performance

#### 4. Adaptive testing

It is essential to employ adaptive assessment tailoring to the learner's needs and skills

#### 5. Assessment for learning

Make the assessment formative, giving enhanced opportunities for the students to learn from their mistakes and providing opportunities for improvement

#### 6. Assessment Rubrics

It is essential to develop clear and detailed rubrics that outline the criteria for each competency, to ensure transparency in assessment

#### 7. Assessment Portfolios

Provide learners opportunities to showcase the evidence of their competency development overtime through reflections and self-assessment  
reflections and self-assessment

## 8. Assessment Committee

Committees may be established for designing, reviewing, and ensuring the validity and reliability of assessments used in CBME

## 9. Alignment with Competencies

Ensure that assessments are directly aligned with the predefined competencies to evaluate what is truly essential.

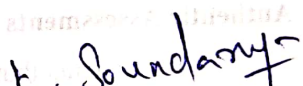

## 10. Audit of Assessment Data

We should regularly review and audit the assessment data to identify areas for improvement and to maintain the quality of CBME programs.

Dear Friends, I thank the Podcast committee for giving me this opportunity to express my views on "Transforming ourselves with the Curriculum" by making ourselves competent in adopting active learning strategies for the generation Z and align ourselves with the curricula through appropriate assessment. Let us transform ourselves into smart medical educators with the transforming curricula... Meet you all with more interesting episodes in future....

Thank you!
