

Institution's Innovation Council

IIC Self Driven Activity

Title: Contagion - The Intercollege Infectious Disease Quiz

Date: 20.04.2025 and 22.04.2025

Organizing Secretary: Dr.P.Sanjay, Dean Research,
IIC – Convener

IIC -Student Coordinator: Deepak V

Objectives:

1. To enhance awareness and understanding of infectious diseases among MBBS students.
2. To promote academic collaboration and healthy competition among medical colleges.
3. To reinforce microbiology concepts through application-based questions.
4. To provide a platform for students to assess their academic proficiency on a broader scale.
5. To encourage student involvement in extracurricular academic events and foster public speaking and analytical skills.

Participants Details:

The event received an overwhelming response with 101 teams registering from all phases of MBBS across multiple colleges. After a screening round, 8 teams were selected, out of which 4 teams advanced to the finals.

Programme Overview:

“Contagion” was an intercollege infectious disease quiz aimed to test and enhance students’ knowledge in microbiology, particularly in the area of infectious diseases. The preliminary round took place on April 20 via Google Forms, with an enthusiastic response of 101 teams from various medical colleges and across all phases of MBBS. Based on their performance, 8 top-scoring teams were selected for the next round. These teams competed further, and the best 4 advanced to the finals held on April 22. The quiz was conducted entirely online and comprised clinical case-based and concept-oriented questions covering topics such as disease transmission, outbreak

control, antimicrobial resistance, and emerging infections. It encouraged critical thinking and applied learning in microbiology. Winners and runners-up were felicitated by the management, marking the successful culmination of a highly engaging academic competition.

Outcomes:

- Strengthened the microbiology knowledge base of undergraduate medical students.
- Promoted intercollege collaboration and exchange of academic ideas.
- Enabled students to apply theoretical concepts to clinical case-based scenarios.
- Boosted confidence and team dynamics among participants.
- Established an enthusiastic and competitive learning environment among budding medical professionals.

Way Forward:

Moving forward, the Institute Innovation Council will continue to conduct various IIC Self Driven activities aimed to promote student knowledge, academic excellence, teamwork and peer learning. IIC will conduct regular contests and sessions to analyze the academic activities of the students and take it step further to convert as ideas and innovations.
